SUBJECT: Application and Eligibility

PURPOSE: The application of eligibility criteria ensures that all practitioners meet the established credentialing and recredentialing standards.

The initial application and attestation indicate a practitioner’s interest in being credentialed and provide information about the applicant that serves as a crucial first step in determining if the applicant meets the established credentialing and recredentialing criteria. The recredentialing application and attestation indicate a practitioner’s interest in remaining credentialed and provide updated information about the practitioner to assist in making the determination of whether he or she continues to meet the established credentialing and recredentialing criteria.

POLICY STATEMENT: The University of Vermont Health Network Credentialing and Enrollment (“UVMHN C&E”) Department establishes eligibility criteria for each type of practitioner. Each practitioner shall meet the established criteria.

Practitioners are required to complete an application and attestation statement as to the correctness and completeness of the information they provide. Practitioners are required to update the application information including the attestation at appropriate intervals. The UVMHN C&E Department uses the CAQH application for practitioners.

PROCEDURE:

The UVMHN C&E Department must receive the practitioner’s authorization to release information before obtaining verifications.
