How to Activate Your MyChart Account:

1. Create Your Account
   Visit [MyChart.UVMHealth.org](http://MyChart.UVMHealth.org) and click Sign up now. You can also skip this step by requesting an account activation code from your medical provider at your next visit or using the code at the bottom of your printed After Visit Summary.

2. Submit Your Information
   Fill out the secure account form and click Submit request.

3. Check Your Email
   Upon submission, you will be sent an activation link by email. Clicking this link from your email returns you to MyChart and inputs the code automatically.

4. Activate Your Account
   Confirm your birthday and click Next.

5. Choose a Username & Password
   Fill out the account information page with your desired username, password, and security question. Accept the terms and conditions by clicking Accept at the bottom of your screen.

6. Update Your Communications
   Choose your preferred communication methods for MyChart communications and alerts.

7. Complete Two-Factor Authentication
   Complete an additional security step the first time you log on and any time you log on from a new device. You’ll be asked to enter your email to receive a security code, which is then entered on the MyChart screen.

If you already have a UVM Medical Center MyHealth Online account, you do not need to create a new MyChart account. Your username and password will work in MyChart.
