

## TEST UPDATE

## Nephrology Profile Update

## UVMMC

Effective 10/9/24, UVMMC's Profile Nephrology order will be replaced by a new test named Nephrology Profile, which is the same testing but has an updated test setup. Updating the build was necessary to prevent clinically necessary testing from being deleted when this profile was ordered with other test batteries that included some, though not all, of the same analytes. There will be no change to specimen requirements or CPT codes.

Test Build Information:

New Orderable	Epic Code	Atlas Code	Mayo Access ID	Order LOINC	CPT Code(s)
Nephrology Profile	LAB17696	LAB17696	FAH6195	N/A	82040, 84520, 82310, 82565, 80051, 84100
Result Component(s):	Epic Code	Atlas Code	Mayo Access ID	Result LOINC	Notes
Albumin	12301001839	ALB	FAH4973	1751-7	
BUN	1230100009	BUN	FAH4985	3094-0	
Calcium	1230100011	CAL	FAH306	17861-6	
Creatinine	1230100010	CREA	FAH4843	2160-0	
eGFR	12301000892	CGFR	FAH5383	50210-4	
Phosphorus	12301002108	PHOS	FAH207	2777-1	
Sodium	1230100005	NA	FAH253	2951-2	
Potassium	1230100006	K	FAH258	2823-3	
Chloride	1230100007	CL	FAH4975	2075-0	
CO2	1230100008	CO2	FAH4976	2028-9	
Anion Gap	1230100013	AGAP	FAH5971	33037-3	
Specimen Requirements:					
Container	Specimen	Temperature	Collect Vol	Submit Vol	Min Vol
SST (preferred)	Serum	Refrigerate	4 mL	1 mL	0.3 mL
Collection Information:					
Green Top (lithium heparin) is acceptable.					
Stability: 48 hours					

Orderable to be Discontinued	Epic Code	Atlas Code	Mayo Access ID
Profile Nephrology	LAB2195	NEPHR	N/A
