

TEST UPDATE

POC Lipid Screening Update

UVMHN

Effective October 10, 2024, Porter Medical Center and Central Vermont Medical Center affiliated sites performing Point of Care Lipid Screening tests on the Abbott Cholestech LDX will begin using **POCT Lipid Panel with LDL (POC133)** for this testing. These sites will discontinue their current POCT lipid testing. See below for details.

Orderable to be Discontinued	Epic Code	HN Site
POCT Lipid Panel with LDL (PMC)	POC11309	PMC
POCT Lipid Panel	POC390	PMC
POCT Lipid Panel with LDL (CVMC)	POC121	CVMC

This change will aid in the standardization of lipid screening on pediatric patients. It will also allow for easier monitoring of quality metrics.

Please reach out with any questions to Dr. Mark Fung, MD, PhD (Mark.Fung@uvmhealth.org) or Dr. Keith Robinson, MD, FAAP (Keith.Robinson@uvmhealth.org).
