

# TEST UPDATE

## Change in Submit Temperature for Multiple Tests

### UVMMC

Effective 2/26/25, the preferred submission temperature for specimens for multiple Chemistry and Immunology tests (see below) will change from frozen to **refrigerated**, as UVMMC has validated the stability for refrigerated (2-8°C) specimens up to 7 days. This means that specimens should no longer be placed on a frozen packing list, but, instead, should be placed on a **refrigerated packing list**. This will help clients and clinicians with workflow since it will no longer be necessary to make frozen aliquots for these tests.
