

TEST UPDATE

HIV Antibody Confirmation/Differentiation Changes

UVMMC

Effective 8/4/25, the reporting format for HIV Antibody Confirmation/Differentiation will be updated to exclude the specific HIV-1,2 band(s), if detected, in the final report. Exclusion of the band(s) will not affect the final interpretation of the results if antibodies to HIV-1 and 2 are present. Results of the specific band(s) can be obtained from the UVMMC Chemistry Laboratory by calling (802) 847-5117.

This change will result in an update to the test build, removing the band result components.

Updated Test Build:

Reflex-Only Test (not orderable)	Epic Code	Atlas Code	Mayo Access ID	Order LOINC	CPT Code(s)
HIV Antibody Confirmation/Differentiation	LAB3340	HIVDI	FAH5829	89365-1	86701, 86702
Result Component(s):	Epic Code	Atlas Code	Mayo Access ID	Result LOINC	Notes
HIV 1 Antibody Differentiation	12301006380	HIVDI1	FAH5830	68961-2	
HIV 2 Antibody Differentiation	12301006378	HIVDI2	FAH5831	81641-3	
HIV 1 and 2 Ab Final Interpretation	12301020129	12301020129	FAH6136	43185-8	

As a reminder, this testing is restricted for use. It is a reflex-only test for samples that are reactive for HIV 1 & 2 Antigen/Antibody, 4th Generation (LAB159) and for use by referring hospitals.

For questions or concerns related to this change, please contact Dr. Hanna Loving (hanna.lovings@uvmhealth.org).
