

Keeping Each Other Safe

Thank you for choosing University of Vermont Health – Home Health & Hospice for your care. We are committed to your safety during our visits. Safe working conditions help our staff provide you with the best possible care.

To help keep our staff safe, we ask you to:

Lock up weapons such as firearms and keep them out of the direct care space during visits.

Confine pets to a room or area away from the direct care space during visits. This helps keep our staff and your pets safe.

Don't smoke or use alcohol or substances prior to and during visits.

To help keep you and your family safe, we:

Wear masks during cold, flu and respiratory virus season and any time you request.

Clean our hands to prevent the spread of infections.

Make suggestions to help you be safe and remain in your home.

Working together, we can help keep each other safe during our visits and beyond.

Thank you for choosing Home Health & Hospice for your care and for being our partners in safety!
