

Test Update

HPV Anal Detect/Genotyping PCR

UVM Medical Center

Effective 6/8/26, HPV Anal Detect/Genotyping PCR, Mayo AHPV, will be defined and available to order by Epic users and clients with Atlas lab interfaces, as a stand-alone order. It will also serve as a reflex test for specific AP workflows resolving issues around reporting that have occurred because the test was not previously defined.

Test Build Information:

New Orderable	Epic Code	Atlas Code	Mayo Test ID	Order LOINC	CPT Code(s)
HPV Anal Detect/Genotyping PCR	LAB17892	LAB17892	AHPV	77376-2	87626
Result Component(s):	Epic Code	Atlas Code	Mayo Test ID	Result LOINC	Notes
Specimen Source	12301021407	MAHPVS	AHPVS	31208-2	AOE
HPV High Risk type 16, PCR	12301021408	M607831	607831	77396-0	
HPV High Risk type 18, PCR	12301021409	M607832	607832	77395-2	
HPV other High Risk types, PCR	12301021410	M607833	607833	77394-5	
Specimen Requirements:					
Container	Specimen	Temperature	Collect Vol	Submit Vol	Stability
ThinPrep/PreservCyt solution vial	Anus or Rectum	Ambient	3 mL	3 mL	21 days
Collection Information:					
Min Vol = 1 mL					
Bag ThinPrep specimens individually as they tend to leak during transport.					
Place labels on the vial and on the bag.
