HSV Type 1 & 2 Antibody IgG (HSVIGP) Change

The assay used for Herpes Simplex Virus (HSV) 1 and 2 IgG testing will be changed from the HerpeSelect (Focus Diagnostics, Inc.) manual assay to the Liaison® XL (DiaSorin, Inc.) automated assay. Correlation studies between the two assays are excellent. There is no change to how the test is ordered or how results will be reported.

Effective Date: November 6, 2017

If you have any questions concerning this change please contact Dr. Clayton Wilburn in the laboratory.
